Summary

Computer Engineering graduate seeking an opportunity to apply and expand knowledge in hardware and software development, embedded systems, and system integration. Brings hands-on experience in technical support, network troubleshooting, technical documentation, and data management, with a strong interest in problem solving, collaboration, and continuous learning.

Education

Holy Cross College — Sta. Lucia, Sta. Ana, Pampanga
Bachelor of Science in Computer Engineering — *Aug. 2022 – May 2026*

Experience

Technial Assistant — San Fernando, Pampanga
DOST Region III — *May 2025 – Aug. 2025*

- Encoded and updated technical data in organizational systems using Microsoft Excel, Google Sheets, and internal database systems.
- Documented hardware, software, and Ethernet network issues to support troubleshooting and resolution using Google Docs and Microsoft Word.
- Performed Ethernet connectivity troubleshooting, including cable testing, IP configuration checks, and network diagnostics using Command Prompt (ping, ipconfig), Network & Sharing tools, and LAN cable testers.
- Collaborated with team members to improve data management workflows and operational efficiency using Microsoft Teams and Google Workspace.
- Created technical guides and manuals to improve user understanding of systems and network setup procedures using Microsoft Word, Google Docs, and Canva.

Projects

Smart Post-Harvest Rice Processing System

* Developed a solar-powered and automated solution designed to improve the efficiency and quality of rice handling after harvest.
* Designed the system to help reduce manual labor, minimize grain loss, and maintain better rice quality during drying and processing.

Technical Skills

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS
Frameworks: React, Node.js,
Developer Tools: Git, VS Code, Visual Studio, PyCharm, Microsoft Excel, Google Sheets, Microsoft Word, Google Docs, Canva
